## Brand logo guidelines

## Vertical logo combination

Recommended for materials used online.  
(Actual applications may vary.)

The Xiaomi logo is an important visual identifier of our brand. It communicates our company's core values and sets the stage for all messaging and communication that follows.

The Xiaomi logo should be used to identify the company in external communication materials to maximize our visibility and to maintain the singular, iconic look with which our audiences identify. Hence, it should not be used as a secondary image in all collaterals and must be treated with utmost respect.

### Minimum clear space

#### Minimum clear space

The Xiaomi logo must have sufficient space around it, so that it is recognizable in all situations and stands out as it should. To ensure this is possible, a protected area should be provided around the logo. Do not allow photos, typography, or other graphic elements to enter the minimum protected area.

#### Protected area

If height of logo is  $X$ , then protected area should be  $1/2X$ .

## 3

## Minimum size

The minimum size should be used only when the layout space is extremely limited. Use the Xiaomi brand logo at a larger size whenever possible.

Special attention should be given to the legibility of the logo when it is applied across all mediums of communication.

The small-sized logo should only be used for smaller size promotional materials, such as pamphlets, single page flyers, etc. Other uses of the logo should be based on the actual size of the promotional material.

For use online

Note:

In the event where the online collateral is extremely small and width of logo is smaller than 53px, please use the logo without the "Xiaomi" characters.

For use offline

Note:

In the event where the offline collateral is extremely small and width of logo is smaller than 6mm, please use the logo without the "Xiaomi" characters.

# B | Brand colors guidelines

# 1

## Standard brand colors

The Xiaomi logo is an important visual identifier of our brand. In order to protect and grow the Xiaomi brand, please follow the guidelines provided in this document.

We have also provided additional guidelines to ensure that our corporate colors are accurately reflected on different backgrounds:

Orange and grey logo combination  
(preferred combination)  
For use on light backgrounds  
(Most preferred application)

The "Xiaomi" word should be reversed to white for legibility.  
For use on dark backgrounds

The "Xiaomi" word should be reversed to white for legibility.

Sometimes, often due to production costs, only one color of ink is available. Hence, the Xiaomi logo must be reproduced only using one color. In this scenario, the logo, logotype, and Xiaomi logo must be used following the convention of using a light color on a dark background or a dark color on a light background.

Keep the logo area clean and without obstructions to make sure that the logo is clearly visible.

The "Xiaomi" word should be in black for legibility.

### Standard brand colors

The use of accurate and precise brand colors help tie our communication materials closer to our Xiaomi brand.

- 1: The signature Xiaomi orange is the most distinctive color, and separates us from the rest of the competition. It is widely used in many of our communication materials.
- 2: The black and white combination provides a sharp contrast and reflects modern day sophistication.
- 3: The deep grey color represents cutting edge technology vibe.

### Brand font (English)

#### Font weight selection

For online use: Please use different front weights (Bold/regular/light) to add emphasis and differentiate content hierarchy.

For offline use: Recommended to use the bold weight, since audience might be far away from the visual.

Use of font weight and size is dependent on the purpose and content of the marketing materials.

Do not exceed 3 weight on the same page.
